

PRODUCT SPECIFICATION SHEET FOR - SHOWER SEATS

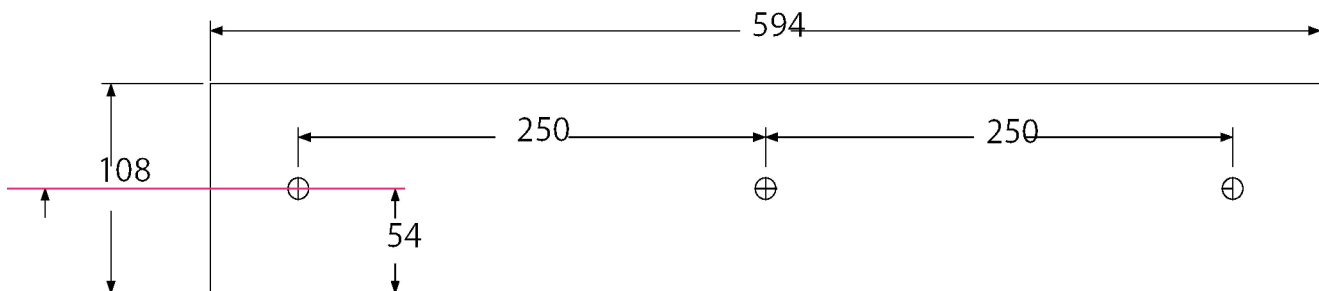

SHS600

Features

- The SHS600 shower seat is a premium Australian designed product for general use in the bathroom
- This design allows ambulant people easier access to the shower seat in a home bathroom.
- Polished stainless steel legs for hygiene .
- The seat moulding is made of soft polyurethane suitable for long term exposure to water.
- Each shower seat package includes stainless steel fixing screws. (please note these screws may not be suitable for all applications).
- Saves space when folded up against the wall.
- This product is safe to have a load of 130kg when installed correctly.
- Successful installation will depend on carefully engineered walls, with adequate blocking.

FIXING GUIDE

To achieve the correct height when installing the SHS600 shower seat, measure 416mm from the floor to establish the center line of the fixing holes .

↓ Please note that the supplied wall fixings may not be suitable for all substrates .
